Samadhan Garale

Aspiring Software Developer | Python, Backend & Generative AI

Mumbai, Maharashtra, India | [Phone] | [Email] | GitHub: [GitHub URL] | LinkedIn: [LinkedIn URL] | Portfolio: [Portfolio URL]

Summary

Aspiring software developer with hands-on project experience in Python applications, FastAPI backends, web development, databases, and LLM-powered applications. Seeking a software development or Python/AI internship to build practical products and strengthen engineering skills.

Technical Skills

Languages: Python, Java, JavaScript, C (fundamentals)

Web: HTML, CSS, JavaScript, responsive UI development

Backend & APIs: FastAPI, Flask, REST API development, Spring Boot (academic/project work), frontend-backend integration

Databases: MySQL, SQLite, MongoDB, Firebase, JSON and CSV storage

Python Libraries: Streamlit, Pandas, Matplotlib

AI / GenAI: LLM API integration (Groq), prompt engineering, streaming responses, AI chatbot development, Agentic AI concepts

Tools: Git, GitHub, VS Code, IntelliJ IDEA, command line, Render deployment

Projects

AI-Powered Portfolio and Resume Assistant (In development) | Python, FastAPI, Groq API, HTML, CSS, JavaScript

- Building a portfolio website with an AI assistant that answers questions about my profile, skills, and projects, using profile data as context for the LLM.

- Developed a FastAPI backend with chat endpoints and streaming responses, configured CORS and environment-based API keys, and connected it to the frontend chat interface.

Citizen Science Species Log | JavaScript, JSON, LocalStorage, GitHub Pages, Render | Live demo

- Built a web app for citizen scientists to record and organize species sightings, with create, read, update, and delete operations and map markers for observation locations.
- Organized sightings by species, category, and rarity; explored Firebase/MongoDB to move beyond browser-only storage, and deployed the app on GitHub Pages and Render.

Digital Wallet Simulator | Python, Streamlit, JSON

- Built a UPI-style wallet simulation to demonstrate wallet and transaction workflows through a Streamlit interface.
- Used JSON for data persistence across sessions.

Education

[Current degree / diploma / class] | [College / School name] | [Board / University] | Expected [Year]

Relevant subjects: [Add if useful]

Coursework and Workshops

- Python and Generative AI training (coursework completed; no certificate awarded)
- Agentic AI workshop participant
- Additional practice: Spring Boot student REST API and Java JDBC with MySQL exercises
